House Committee, Fearing Trouble with Japan, Authorizes Flotilla.

TWO-WARSHIP PLAN WINS

Secret Message to Lawmakers Decides Them on Defense of Western Coast by "Diving Boats."

Strong defense of the Pacific Coast by submarines, in anticipation of possible war with Japan, is authorized in the naval appropriation bill which soon will be reported to the House. The House Naval Committee, which is preparing the annual budget, rearranged the adminisannual budget, rearranged the administration building program submitted by Secretary Daniels so that provision could be made for submarine defense of the Pacific Coast. It is the understanding that the reason for this action on the part of the committee is embodied in information that came from the executive branch of the government, the nature of which is withheld.

By a formal vote the House commit-

In order to keep the naval bill within the limit of a little more than \$140,000,000 the committee cut down on other features of the administration building program so as to provide for eight submarines. It reduced the number of destroyers from eight, which were recommended by the Secretary of the Navy, to six.

Two Warship Plan Wins.

The two battleship program was adopted. The proposal to authorize two Dreadnoughts was carried by an over-

whelming vote.

The "small navy members," headed by Representative Witherspoon, of Mississippl, showed their displeasure with the majority who voted for two battleships by leaving the committee room before the final vote was taken. Mr. Witherspoon served notice that he reserved the right to fight the two battleship provision and other features of the building program.

The too rapid payment of the floating debt, borrowed from its partner, the United States, by the District for its share of the cost of the extraordinary improvements of that decade, has been given as the reason for cutting the estimates for the municipal service and for other objects. Now that the floating debt has been paid, no sufficient reason appears for keeping back the progress of the National Capital. The harmonious development of its park sites, its streets, avenues and bridges; the harmonious development of its municipal services and institutions so as to make the Capital the best in the world and directly representative of the best of our nation, call for regular, systematic, adequate appropriations under the "half-andhalf" principle. All the statesmen of the past, beginning with George Washington, who have dealt with the National Capital have realized that its appropriate development and maintenance are impossible unless the nation does its duty to it. The nation desires so to do. Doubtless
